

February 2, 2026

Dear Valued Client,

Labcorp remains committed to supporting your practice and promoting responsible lab stewardship. As part of our mission to improve health and improve lives, we will be transitioning our coagulation testing platform across our laboratories. This enables us to standardize and modernize instrumentation, streamline the testing menu and improve testing efficiency. This update includes changes to both testing reagents and the instruments used. Our internal studies show these enhancements will improve testing efficiency for you and your patients. As a result of this transition, Labcorp will discontinue certain test numbers and offer alternative test options, effective March 30, 2026.

We recognize that these test updates may require changes that impact your workflow, systems and staff processes. Please know that we do not take that impact lightly, and we are committed to providing you as much advance notice as possible as we provide information about these changes.

Please see the tables on the following pages for a summary of upcoming test changes, as well as links to additional materials that may be helpful. If you have questions regarding these changes, please contact your local representative or call Coagulation customer service at 336-436-3483. We appreciate your business and support.

Sincerely,

Labcorp

## Summary of changes
